Call for Papers

THIRD INTERNATIONAL WORKSHOP ON ETHICS AND HUMAN ENHANCEMENT

Granada, June 3 - 4, 2019

We are pleased to announce an international workshop on ethics and new technologies of human enhancement (for example, artificial intelligence, neurochemical interventions, transcranial stimulation devices, etc.) co-organised by BIOethAI+ Project (University of Granada) and the Wellcome Centre for Ethics and Humanities (University of Oxford).

Although the main focus of the workshop is ethics, proposals for participation that consider human enhancement in its different ways (physical, cognitive, emotional or moral) from other areas such as philosophy of medicine, philosophy of technology and political philosophy will be welcome.

The confirmed keynote speaker is **Julian Savulescu** (Oxford Uehiro Centre for Practical Ethics, University of Oxford), who also participated in the previous editions of this workshop, held in Granada on February 2010 and June 2014. Other confirmed speakers are Hannah Maslen and Jonathan Pugh (Oxford Uehiro Centre for Practical Ethics, University of Oxford).

Those interested in presenting a paper should send an abstract in Word format of 500 words maximum, in either English or Spanish, before **April 14, 2019**. Applicants will be notified by April 30 whether their abstracts have been accepted. The paper presentation will not take longer than 20 minutes and each presentation will be followed by a 10-minute discussion. A selection of conference papers may be published in a volume or journal special issue on human enhancement.

For inquiries and abstracts submission, please email to

granadaenhance@gmail.com

Registration is free. The University of Granada and the Spanish Government sponsor this event.
