

# UNIQUENESS OF TRIVIAL SOLUTION FOR THE DIRICHLET PROBLEM INVOLVING THE FRACTIONAL LAPLACIAN OPERATOR

ALEXIS MOLINO

ABSTRACT. In this talk we establish the uniqueness of trivial solution to

$$\begin{cases} (-\Delta^s)u = f(u) & \text{in } \Omega, \\ u = 0 & \text{in } \mathbb{R}^N \setminus \Omega, \end{cases}$$

being  $\Omega \subset \mathbb{R}^N$  ( $N \geq 1$ ) a bounded domain and  $f$  locally Lipschitz with non-positive primitive.
